UI - User interface

In the beginning of 2024, RZ4AG, Alexander Anipkin asked on DXSoftSupport Telegram channel anybody willing to participate in the development of new version of AALog, radio amateur journal.

I nodded within my head, "Why not?". At that point, I did no know it will be Lazarus IDE and Pascal code. it turned out interesting project.

Free Pascal Compiler makes code run on Windows, Macintosh (MacOS) and Linux (with addition of several decades of othe platforms).

My tasks included to redraw graphical elements (dialogs, forms).

To facilitate collaboration, I deployed source code repository based on self-hosted Gogs version control environment.

Later on, I began to see, that several projects, that I use daily.. are written using Pascal, and they works!
