

DXpeditions

DXpedition is a combination of two words: DX (distant station) and expedition, which means a long distance radio (amateur) station is heard and/or contacted. I am keen of "activating" rare locations, which requires travelling to unusual places. Greatest DXpeditions I was involved are Märket Reef (OJ0), Galapagos Islands (HC8). This is about these strange guys with antennas, who sit with headphones all day (and night) long listening for strange sounds and voices and time to time speaking odd sentences like "Hotel-Zulu-One-Delta-Zulu.. copy.. Five-By-Nine.. Q-S-L". Are they nuts?
